Research model/choose dataset											
Model/transfer learning research											
Pose Estimation research											
Gesture Dataset Adaptation											
Gesture Model Training											
Model Evaluation with dataset											
Model Testing with Pose Estimation											
Pose Estimation Integration											
Hand Detection Library Research											
Testing Using Webcam											
Matplotlib Visualization Tools											
Pose Estimation Code											
Transition to New Webcam											
ROM and Calibration											
Read library documentation											
Begin testing mouse/cursor libraries											
Create OS Interface document											
Create mouse movement module											
Add gesture inputs to mouse											
Integration											
Testing/Verification											
Proposal Presentation											
Design Review Presentation											
Design Review Report											
Ethics											
Final Presentation
