

Eshani Mishra
Team B2

What did you personally accomplish this week on the project? Give files or photos that demonstrate your progress. Prove to the reader that you put sufficient effort into the project over the course of the week (12+ hours).

- Worked on design presentation
- Worked on design report
- Emailed Nace about issues with Quartus version and completed DE-10 tutorials that did not require Windows software
- Used serial communication to interface with SoC but was unable to login
- Emailed Nace to clear up login issues on SoC root account -> will need microSD to SD adapter to reflash Linux image

Is your progress on schedule or behind? If you are behind, what actions will be taken to catch up to the project schedule?

- Our project is behind because most of us have been working on the design presentation and design report, also we did not receive the camera until Friday of this week so I was delayed in testing with the camera
- My progress on designing the user poll for video quality is also behind because of the additional time required to work on the presentation and the report
- I will use our built in slack time to catch up on testing with the camera, work through the issues with the Linux image and Quartus versions, as well as designing the user poll

What deliverables do you hope to complete in the next week?

- Test GPIO camera
- Design user poll for testing
- Test all versions of Quartus to see which ones are more compatible with DE-10
- Design report
- Present to Professor Low (unable to attend last week)
