Shruti Narayan (Team B2)
- What did you personally accomplish this week on the project? Give files or photos that demonstrate your progress. Prove to the reader that you put sufficient effort into the project over the course of the week (12+ hours).
  - Finished drawing out full FPGA implementation diagrams (FSM, datapath, etc)
  - We worked on the design presentation and I practiced and gave the presentation
  - We worked on the design document (I specifically contributed to the Architecture, System Descriptions, and some Design Trade Studies)
  - The camera arrived this week, we will test it early next week
  - Discussed slight change to algorithm because of our seam removal method might yield overlaps - planned to write in checks for this
- Is your progress on schedule or behind? If you are behind, what actions will be taken to catch up to the project schedule?
  - We fell behind this week - partially because we were focused on the design presentation and document as well as reflecting on others' projects, as well as the fact that I fell sick
  - I did not start checking over the SDRAM memory controller.
  - We are going to adjust our schedule and use our planned slack time
- What deliverables do you hope to complete in the next week?
  - Working SDRAM controller module
  - Test out the camera and have a basic input video to output monitor through the FPGA
