

Eshani Mishra
Team B2

What did you personally accomplish this week on the project? Give files or photos that demonstrate your progress. Prove to the reader that you put sufficient effort into the project over the course of the week (12+ hours).

- Worked on design report
- Reflashed DE-10's microSD card with Linux image
- Requested space change to be able to run software on Windows
- Tested different versions of Quartus with DE-10

Is your progress on schedule or behind? If you are behind, what actions will be taken to catch up to the project schedule?

- This week's progress is behind because we realized we need to be able to run software on Windows since the Linux versions did not have documentation or were only command line versions
- We will use our slack time for writing the algorithm and we requested a space change to a room with PCs and help from Professor Nace and ITS to set up a Windows installation for us
- We are on schedule for testing the camera (done by Shruti) and testing different versions of Quartus

What deliverables do you hope to complete in the next week?

- No deliverables for next week - Spring break
