Kimberly Lim
Team B2

What did you personally accomplish this week on the project? Give files or photos that demonstrate your progress. Prove to the reader that you put sufficient effort into the project over the course of the week (12+ hours).
- Finished ethics assignment (both pre & post discussion)
- Processed samples for video demo
- Wrote script to convert sample into right video format
- Wrote team report

Is your progress on schedule or behind? If you are behind, what actions will be taken to catch up to the project schedule?
- Behind on writing algorithm (focusing on getting the video through our data pipeline for our in class demo without processing the video)
- Slack time accounts for this

What deliverables do you hope to complete in the next week?
- Get the script and video samples onto the FPGA board and test out the entire video pipeline
