

Shruti Narayan  
Team B2

What did you personally accomplish this week on the project? Give files or photos that demonstrate your progress. Prove to the reader that you put sufficient effort into the project over the course of the week (12+ hours).

- We worked together to finish the final report presentation - I worked on the block diagrams and getting numbers and visuals for our timing analysis
- We ran into issues with integration - our design did not fit onto the board, and there were issues with our read/write through FIFO. We worked together to pull integration together over many nights
- We learned Signal Tap and used that to debug our design
- I drew out various FMS's and started working on our final report - also to help debug and gain clarity
- I modified some of the data pipeline to create a parallel adder of latency 1 to have a more concrete account of when data moves through that segment

Is your progress on schedule or behind? If you are behind, what actions will be taken to catch up to the project schedule?

- Our project is slightly behind schedule - we have modified our MVP to be able to achieve one seam

What deliverables do you hope to complete in the next week?

- We will demo on Monday!
- We plan to collect user testing data during our demo to include in the final report
- We will complete the final report by Wednesday
