

Kashish Garg  
Team D1

### **What did you personally accomplish this week on the project?**

- Completed Design Review Document incorporating feedback from the presentation
- Ordered the additional parts needed Raspberry Pi
- Researched setting up the Raspberry Pi
- Installed the libraries needed for object detection from the ultrasonic sensors
- Wrote sample code for object detection

### **Schedule**

Slightly behind schedule – the SD card needed to set up the Raspberry Pi did not arrive with our components, so I was unable to test the code. However, I got started on the object detection module, so I should be able to catch up in the week after spring break.

### **What deliverables do you hope to complete in the next week?**

SPRING BREAK – No deliverables.

The following week:

- ssh into Raspberry Pi
- Incorporate the current code base onto the Pi
