

Matteo Longo

Team D1

What did you personally accomplish this week on the project?

- Soldered pins to motor shield to attach to Arduino
- Measured devices for current throughput
- Researched alternate power sources
- Purchased 6V batteries for boards

Schedule:

- It will take more time assembling components and getting the proper wires to power everything

What deliverables do you hope to complete in the next week?

- Finish wiring components together for testing configuration
- Update circuit diagram with new power sources and data
