Matteo Longo

Team D1

What did you personally accomplish this week on the project?

- Rewired all sensors for debugging
- Soldered wirings into board for secure connections
- Tested load cell
- Attached food tray to load cell and stabilized the system

Schedule:

- Assuming testing and debugging gets completed, we will be able to finish all tasks and some stretch goals.

What deliverables do you hope to complete in the next week?

- Attach kill switch
- Add speakers for playing music
