

Matteo Longo

Team D1

What did you personally accomplish this week on the project?

- Mounted sensors on robot frame
 - Salvaged bracket for ultrasonic
 - Drilled holes and attached modified circuit board for thermal camera
 - Cut custom wires and sought more jumper cables
- Added wiring capability for 3 ultrasonic sensors for higher accuracy

Schedule:

- Very little accomplished due to carnival, so remaining slack is consumed. There will have to be longer hours to complete load cell configuration.

What deliverables do you hope to complete in the next week?

- Attach kill switch
- Attach load cell for tray
